## PERSONAL PROFILE

Answer: 400 characters is between 60 words and 100 words with spaces included in the character count. If spaces are not included in the character count, then 400 characters is between 70 words and 130 words. According to research by Miller, Newman, and Friedman, the average length of a function word was 3.13 letters; for a content word the average was 6.47 letters. Yes indeed, it is.
